## Summary

---

I am a 4th-year student, training as a mining and mineral processing engineer. As an aspiring engineer, programming is the way to approach mining in the near future as it becomes more automated. Data Science and Machine Learning are most relevant in my career, enabling design and production of exploration and testing equipment that will improve efficiency in mining processes. I am very enthusiastic about harnessing the power of computer technology to improve and protect lives and the environment.

## Skills

---

C++, Python, Eng. Circuit Design(P.C.B Eagle), Eng&Design AutoCAD, Eng&Design INVENTOR, Communication skills

## Education

---

TAITA-TAVETA UNIVERSITY | Voi, Taita-Taveta

BSc. in MINING AND MINERAL PROCESSING ENGINEERING | 11/2024

Currently enrolled.
