## PRICING

The translation rate depends on the following:-

**Level of urgency.** The price will naturally increase for a translation that needs to be carried out as soon as possible. The extra charge may be from 10 to 100%, depending on the translation deadline and complexity.

**Text layout.** Often, there are cases where the files sent for translation are not in the usual .doc, .txt or .pdf file extensions, but rather in various exotic formats such as language files of website interfaces or programs, or even scanned images of handwritten texts. Here, our translators are not programmers neither are they graphologists. They specialize in one profession, which is translation. That is why the more difficult it is extracting or recognizing the target text, the more expensive the translation will be.

**Text size.** If the size of text to be translated is, for example, less than 500 characters, it will be translated at a fixed price, which will be higher than the price at a standard rate because operating costs for such translations (commissions charged by payment systems, telecommunications payment, etc) are normally higher than the rated price of the order. In another case, when the text is more than 50 pages in size, we offer discount depending on the particular size.
