Client satisfaction is iCentech's goal. iCentech has set up long term cooperation relationship with a number of top companies and all of them are enjoying working with iCentech.

2,000+ linguists

Thanks to iCentech's network of 2,000+ experienced linguists around the world, we are able to provide native speaker language services in most of Asian, European and Latin American languages.

Translation Memory

Translation Memory technology provides the means to ensure consistency with previous translations and within the same document, and to cut down both turnaround time and costs. At iCentech we use TM with all clients and projects. Discounts based on TM matches are also provided so that our clients can enjoy the benefits of TM.

Streamlined Workflow

iCentech's streamlined workflow ensures we can deliver high quality language services to our clients. In addition to select professional linguists for the text translation, editing and QA are also carried out to ensure the quality is at high level. For jobs that require engineering, DTP, and testing and, quality check is also carried out to make sure the quality is perfect.

Competitive Price

Thanks to our technology, streamlined workflow and high efficiency, iCentech is able to provide competitive prices for our client.
