About US

Mayra Enterprise is a multilingual translation agency that provides professional language translation services in all the major Indian and Foreign languages. We add a wealth of experience in terms of translation expertise, technology, and management to your projects. Our long-standing commitment to quality, service, on-time delivery, and fair pricing policy has made us one of the most trusted translation agencies in India.

Translators are our assets. Therefore, we connect with only the best professional native translators. To get quality output and save time, our project service team ensures that translators get all the documents and source files reviewed to avoid back and forth during a translation. This helps in maintaining quality standards and timely delivery at all times.

In line with our commitment to delivering exceptional client services, we carefully match our each resource translator in accordance with the demand of the project. The professional background and education of the selected resource always ensure expertise, precision and accuracy which is our foremost priority to ensure client's satisfaction.

Due to our firm belief that quality is the critical component that should not be compromised upon, we engage with the best in business for native language translation service so that our clients get the translation which is a compelling rendition of

the original document. Due to investment in technology, we have been able to reduce the turn-around time for projects, whether big or small.

Our range of services cover the entire spectrum of global language translation and localization service in print, audio-visual, and digital media for all types of industries and service organizations.

The secret of our success is our dedication to client satisfaction. We believe in delivering excellent language services that exceed expectations, ensuring strong client relationships and help them develop.

Quality Process:

- Content Evaluation: Analyzing Source document & extract exact word count deploying various CAT tools.

- Translation: Native Language Expert with content domain expertise over 10+ years of experience.

- Translation Review / Proofreading: Another Language expert reviews complete translation to make it error free.

- Editing: Adhering to the style guide to develop a replica of the Original source document.

- Final Check: After file is completely proofread, Internal Quality team and Project Manager review entire file for 100% accurate translation.

Sworn & Certified Translation Service

Legal documents and formal letters require the expertise of a sworn translator when being translated into a foreign language. Sworn translations are essential for all legal documents undergoing translation if they are to be accepted according to local laws. Each translated document is formatted based on the requirements of the

country concerned. Examples of legal documents, requiring a certified translation service, include court decisions, certificates, diplomas, licenses or permits, statements, company registration certificates and letters of lawyers or law mandates.

A Sworn translation bears the signature and valid stamp of an authorized legal translator. This certification guarantees that it is an official translation, requiring our certified translation service, which cannot be sent by fax or e-mail, as doing so will void the certification. Only hard copies can be sent as the stamp and signature of the sworn translator are required to verify authenticity.

Sworn translations are required for both business and individual purposes. Our professional sworn translation team is highly qualified to undertake any sworn translation project, consisting of professional translators who have obtained formal training, not only about a specific language but also the ins and outs of the country's lingua, so they can provide accurate translations, and an excellent certified translation service.

Interpretation Services

Interpretation refers to the service of vocally interpreting the speaker who speaks a different language into a language that the audience understands and vice versa. When vital information has to cross language barriers in real time, there's no room for error. **Mayra Enterprise** offers simultaneous, consecutive, and telephonic and onsite interpretation services in over 150+ languages.

Our team of professional interpreters specializes in providing interpretation services in Indian, Asian, Middle Eastern and European languages for international conferences, seminars, and meetings.

Consecutive Interpretation: Consecutive interpretation is when the interpreter interprets right after the speaker pauses. It takes place often at one-to-one meetings and does not involve interpretation equipment and technologies.

MAYRA ENTERPRISE

Simultaneous Interpretation: Simultaneous interpretation is when the interpreter interprets while the speaker is speaking. Most conferences and seminars require Simultaneous Interpretation. Simultaneous Interpretation requires equipment which typically consists of headphones at each delegate's seat along with a console indicating language to select.

Telephonic Interpretation: Also Known as over the phone interpretation. If you need to communicate with a non-English speaker, telephone interpreting is a simple way to instantly communicate. Telephone interpreting is more commonly used for situations in which all language speakers who wish to communicate are already speaking to one another through telephone. Our Telephone Interpretation Services is available to all industries.

Onsite Interpretation: Sometimes phone interpretation isn't practical, legally allowable or socially correct. In these cases, you need an onsite interpreter who is not only skilled in language interpretation services, but also presents a professional appearance that reflects well on your organization.

Transcription Services

Mayra Enterprise offers a fast and professional audio transcription service; converting a spoken language source into the written form. Upon listening to your recording, we will appoint transcribers specializing in the required subject matter to type out word-for-word what is being spoken. We can also subsequently translate your transcript.
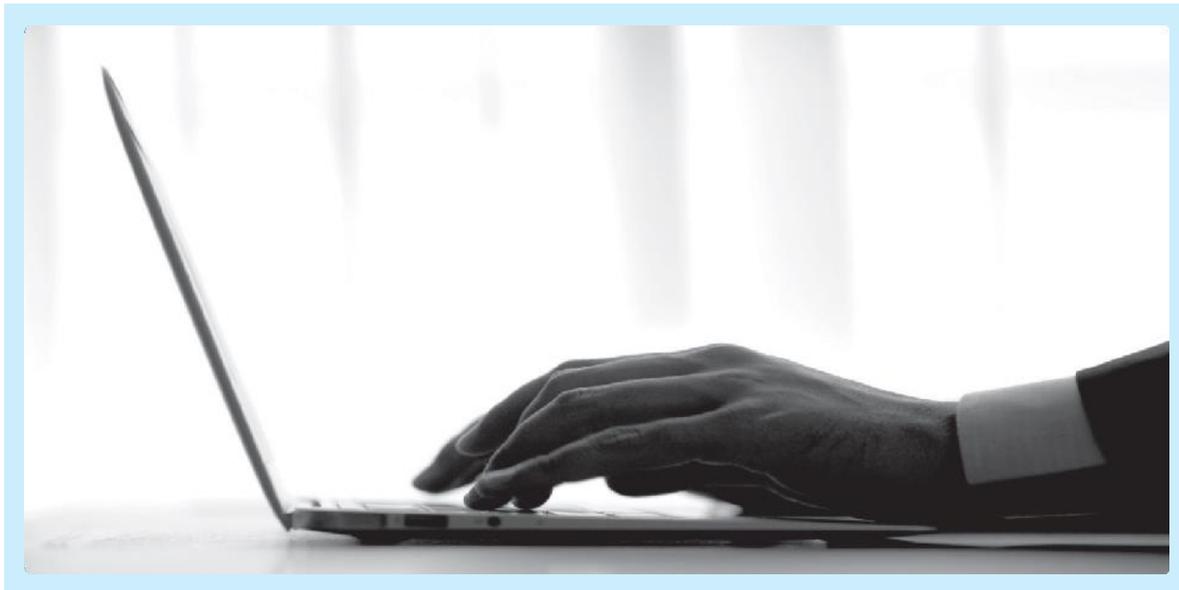

Good quality sound files enable the best transcription possible. Electronic files are preferred since they provide the quickest and easiest formats to work with and can be uploaded securely to our website. Alternatively, Mayra Enterprise can also offer a transcription service for the following formats: mini, micro and standard cassettes, mini discs, CDs and DVDs. Please note that if sending recordings through the post we do recommend that you use either Special or Recorded Delivery in order that you can track delivery.

Subtitling

We understand that subtitling is the most efficient way of making an audio or video program universally applicable. Subtitling or captioning services involves display of text versions of the audio dialogues in audio-visual content including films.

Subtitles are essentially a feature that appears at the bottom of the screen and could be loosely termed as the storyline of the presentation or the movie. Subtitles could be the text of the storyline and dialogues in the same languages or a different language through the process of transcription and translation. Hearing impaired or deaf audience have no other recourse but to rely on subtitling on your presentation.

Being experienced in their respective fields, our linguistic experts effectively study and analyze every audio and visual input during the content creation process. They then create quality subtitles by replacing words in the original document with a synonym that expresses the same feeling. Thus, the translated subtitles which we offer communicate the original message without changing its meaning. Our subtitling translation service covers a wide range of regional and foreign languages.

Voice over

Mayra Enterprise is a multimedia, multilingual powerhouse offering cutting-edge AV production services. Our producers work with you to find the best translators and voice talent for your project. Great voice-overs require precise timing, and we bear that in mind every step of the way. The result is a perfectly-synced adaptation in the languages of your choosing.

MAYRA ENTERPRISE

Whether you need voice-overs or lip-synching for presentations, television, radio, voicemails or any other AV-related medium, we get it right the first time.

Content Writing

Content Writing is giving the readers or customers a brief about what you actually offer. A viewer turns up to a website not to get overwhelmed, blown by the graphics and excellent pixel quality that they have but for the value of information that you have on offer. Mayra Enterprise has accepted this responsibility of providing its clients with the Content Writing solutions along with all other services that we provide.

We ensure you content that is super fine in quality, to the point, short yet filled with information throughout. To achieve these standards the content is specifically designed for every client, understanding their requirements, expectations and after a thorough market analysis done by our experts. High quality content helps you connect better with your readers and clients.

While providing information we take utmost care to mince it down and make it digestible for one and all. The lay man is the one who comes to us to extract; and satisfying the target audience is our prime objective. A team of professionally qualified, writers researching & developing content 24*7 to guarantee you the best of our services at Mayra.

Data Entry

Data Entry refers to the process of typing or entering information manually on the computer. The software used for data entry is Microsoft Office Suite which includes the following Word, Excel, Access, Outlook and OpenOffice. Data Entry requires good typing skills and accurate grammar which involves accurate use of punctuation and appropriate use of spaces. It involves collecting the raw data and entering it on the given form. The raw data is given in the forms of images or handwritten documents. Data Entry also includes data scrubbing or data cleansing which is a process of removing data from the database which is incorrect, incomplete, improperly formatted or duplicated. The sectors catered to include banking, insurance, telecommunications, retailing and many others.

There are a lot of data entry jobs available online which could either be a full time or a part time option that involves working from home, which in turn helps a person earn an additional income

Companies find it easier to outsource data entry jobs to people who prefer working home as they are able to get a lot of people and save a lot of cost. A person who enters data or does a data entry job is called a data entry clerk or data entry operator, nowadays known as office assistants. A lot of times LinkedIn and other social networking sites for example Facebook are used to promote data entry jobs.

If you are looking for a professional, cost effective and the most comprehensive solution for all your Data Entry requirements, Mayra Enterprise is just for you.

Website Development

A website is what represents your business to the entire World Wide Web and helps you make it a brand. Developing a website is basically designing, creating, making and implementing into visuals all the details and information. It has to be developed in a way suiting your task, which can be achieved only by customizing every aspect specifically for an order. This is what defines the website development done at Mayra Enterprise.

MAYRA ENTERPRISE

Only a visually pleasing website is not enough to hit the bulls eye, you would need a huge back up force equally or more powerful to support your system. A perfectly coded html, interactive system integration and user-friendly interface are an integral part too.

Along with the basic structure and design an advanced Graphic User Interface is designed, audio, video and animations are added to it. The quality of content that gets associated with the website is also assessed and moderated. Not a single slot is left unfilled to say the least.

Our engineers, technicians and guides are positioned to help you through a technical glitch that might occur at any hour. A tough to bypass security, shields all you data and confidential information, error rectifiers, filters prevent damage to the website and your brand.

Websites are often attacked by antisocial elements and unethical hackers, malwares and viruses we ensure you minimum concern maximum security. A good, solid, strong server to backup your website is also made available by us. Team of experts specifically working on research & development keep us and our clients updated with all the changes that happen in the world of web.

Optimizing it to suit and complement the search engine, make it easier for users to reach and go through the content is among priorities. Themes are built and customized taking into consideration type of business, target audience, load of traffic that is attracted to your website.

Mayra Enterprise guarantees you best in class, efficiency, quality services at competitive price, customers love us competitors envy and we are proud to serve our clients to the best of our abilities.

DTP Desktop Publishing

Mayra Enterprise portfolio of services also includes the steps that follow translation, up to print-ready layout. While many other providers are only able to handle simple text files, we have the technical capabilities to translate files that were laid out in desktop publishing formats. We use a proprietary export filter to export text from layout formats such as InDesign,

Frame Maker, PageMaker, Illustrator, CorelDraw, Photoshop, HTML, Freehand, and Interleaf. After translation, the texts are automatically imported back into the original layout. All structural and format characteristics of the original document, such as fonts, graphics, and special characters remain intact in the translated target document.

Website Localization

Your Website can speak every language

An effective Website translation is a competitive advantage Modern, internationally-aligned corporations are expected to have flawlessly translated websites in several languages. Reasons: This is because markets are more international than ever and contain enormous opportunities. Take advantage of our translation services and language expertise so you can fully exploit these opportunities.

Website localization or website translation is the process of modifying an existing website to make it accessible, usable and culturally suitable to a target audience. More than 1/3 of all internet users are non-native English speakers, and according to Forrester Research, visitors stay for twice as long (site stickiness) if the website is in their own language. As companies look to expand into new markets, reach a global audience and increase international sales, the benefits of website localization are clear. Language Scientific takes the guesswork and hassle out of the website translation experience. We

pick up when your developers and marketing people have left off. We can work with you whether you have a content management system or not. Simply provide us with the source files and we will return translated files ready for upload.
