ABOUT US

We're linguistic experts and cultural translators. We build deep relationships with the biggest brands in the world, so they can build deeper relationships with their customers. We're fluent in 350+ languages, as we combine human empathy and machine intelligence. We've been doing it since 10+ years. Through our world-class platform, we orchestrate a network of 50,000 passionate experts around the world, who partner with brands to create culturally rich experiences. While our roots began in translation, our work today encompasses the realms of linguistics, AI, and data quality. Our experts dig deep to convey the most with every word and extract the most from every data point. Powered by people and augmented by cutting-edge technology, we deliver resonance with speed, scale, and precision.
