About me

I love this job, translation fulfills me in every single way. I've already translated articles, files, CVs, Ph.D.'s, captions, everything really, as this is one of my purposes in life: to bring people together and let them work as one without the barrier of language.

With many articles translated and published nationally and internationally in the area of law, medicine, engineering, and sciences.

Thank you for taking the time to go through my CV. It means a lot to me since time is the most precious thing we have.
