Yoruba Expert

I made use of online tools to craft and deliver engaging lessons that suited my students' educational needs. I used canva, a creative platform for designing slides and presentations that sparked curiosity and interaction. I was diligent in grading homework, projects, and quizzes and keeping track of my students' progress. I also communicated any technical issues or notable incidents to the relevant staff member. I made learning fun and effective by creating trivia games like kahoots for kids, puzzles and pre-recorded videos that enhanced my students' comprehension and retention. I used google services to assess and connect with my students. I maintained a consistent and focused learning environment by setting and enforcing clear objectives. Also, I have translated several text and literatures for the organization.
