Project Details

- **Domain:** Image Processing.
- **Project Title:** Web Cam Based Student Attendance System.
- **Platform:** Windows
- **Description:** In order to reduce manual efforts, save time and to produce more accurate student attendance report, we propose a "Web Cam Based Student Attendance System" that takes classroom attendance automatically using face detection and recognition technique. The faces are detected by current frame captured by camera and compared with stored faces. Also various reports of attendance are generated automatically.

Work Experience

- **Digital Marketing Intern (June 2019- Feb 2020)**
- **Freelance Content Writer (Feb 2020- July 2020)**
- **Freelance Content Writer and Translator (March 2021- Present)**
